About Lupus

Lupus is an autoimmune disease that turns the body's defenses against itself and causes inflammation of various parts of the body, especially the skin, joints, blood and kidneys. It affects one of every 185 Americans and can affect anyone, anywhere. Although it can occur at any age and in either sex, more women are affected than men.

About LFM

The Lupus Foundation of Minnesota (LFM) is a non-profit charitable organization that provides education, support and service to those affected by lupus; promotes awareness and understanding of lupus to the broader community and; supports research that seeks to improve diagnosis and treatment of the disease as well as to discover a cure.

LFM was established over 30 years ago to raise awareness and fund research in an ongoing effort to improve the lives of others. In meeting our mission, we work to provide hope, compassion, empowerment, support, independence and dignity to those living with lupus, and to their family, friends and supporters.

For more information on the disease or the work of LFM, visit the website at www.lupusmn.org or call 952-746-5151.
